Introduction

On an annual basis, the Indiana State Department of Health requests licensed ambulatory surgical centers to describe their resources, utilization, and outcome from the surgical procedures. This report summarizes the information for calendar year 2007.

Characteristics of Ambulatory Surgical Centers

| CHARACTERISTICS OF CENTERS | STATEWIDE STATISTICS |
|---|----------------------|
| Number of surgery centers | 138 |
| Number of counties with surgery centers | 31 |
| Number of surgery rooms* | 476 |

*(Based on reports filed from the ambulatory surgery centers)

These centers are established, equipped, and operated primarily for the purpose of performing needed medical surgical procedures and services. These centers are an alternative source of surgery performed in hospital-based outpatient operating rooms.

Outcome from Surgery

Patients are referred to a surgical center based on recommendations from their health care provider. Most patients arrive with low risk for surgery and have no prior chronic problem that may interfere with the new procedure. Most patients are treated within two or three hours and discharged to family members under the care of their family physician.

A small percent of these patients do expect limited problems after the operation, and are referred to an acute care hospital for treatment of stable or unstable medical conditions. The percent of inpatient transfer is higher with patients with existing cardiac or acute problems seen prior to surgery.

| OUTCOMES FROM SURGICAL PROCEDURES | STATEWIDE STATISTICS |
|---|-----------------------------|
| Number of patients transferred to a hospital with stable medical conditions. | 1,292 of 441,485 patients |
| Number of patients transferred to a hospital with unstable medical conditions. | 158 of 441,485 patients |
| Number of patients with a post-surgical wound infection. | 372 of 441,485 patients |
| Number of patients who stayed over 24 hours. | 111 of 441,485 patients |
| Number of patient deaths. | 1 Death |
| Percent of patients with no other medical problems other than need for surgery. | 23.9% |
| Percent of patients with a chronic (mild) systemic disease prior to surgery. | 40.9% |
| Percent of patients with a chronic (severe) systemic disease prior to surgery. | 12.4% |

It is recommended that individuals considering outpatient surgery discuss the need with their physician, discuss coverage with their insurance representative, and notify the surgeon of any prior conditions prior to arrival at the surgical center.
